

ANISH S

AI/ML Engineer | Deep Learning | Computer Vision | NLP | Full-Stack Developer

✉ anishsundar28@gmail.com | <https://github.com/Anish-AI-ML> | <https://anvetech.site>
✉ <https://www.linkedin.com/in/anish-s-77310434a> | ✉ Chennai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Motivated AI/ML Engineer with expertise in Deep Learning, Computer Vision, and Natural Language Processing. B.E. Computer Science & Engineering (AI & ML specialization) student at Sathyabama Institute of Science and Technology, graduating 2028. Currently undertaking AI internship at iStudio. Previously completed industrial AI training at 1StopAI with certifications in multiple AI/ML domains. Founder of ANVE TECH, providing AI-powered solutions and full-stack development services. Proficient in TensorFlow, PyTorch, Python, React, and cloud technologies. Seeking full-time AI/ML Engineer role to drive innovation through intelligent automation and data-driven solutions.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Specialization: Artificial Intelligence and Machine Learning

Sathyabama Institute of Science and Technology, Chennai | Expected Graduation: 2028

Higher Secondary and Secondary Education (CBSE)

AKT Memorial Vidya Saaket School | 2021 – 2024

PROFESSIONAL EXPERIENCE

Artificial Intelligence Internship

iStudio | Pune, Maharashtra

July 2026 - September 2026 (3 months)

- Selected through competitive Internship Common Aptitude Test (iCAT) based on outstanding performance
- Developing and deploying production-ready AI/ML models in end-to-end project pipelines
- Applying Deep Learning frameworks and Python-based tools to solve complex real-world business problems
- Intensive training in AI fundamentals, model optimization, and deployment strategies
- On track to receive Training & Internship Certificate upon successful project completion

Artificial Intelligence Internship - Industrial Program

1StopAI / Personifwy | Chennai, Tamil Nadu

July 2025 - September 2025 (3 months)

- Successfully completed Industrial Program on Artificial Intelligence with intensive project-based learning

- Developed three core AI projects: Text Classification (NLP), Object Detection (Computer Vision), and Landmark Detection (CNN)
 - Achieved high model performance through hyperparameter tuning, data preprocessing, and iterative optimization
 - Received Certificate of Project Completion and Certificate of Participation for outstanding contributions
-

FEATURED PROJECTS

Text Classification using TensorFlow | Python | TensorFlow | NLP

- Engineered a multi-class text classification pipeline with TensorFlow featuring tokenization, embedding layers, and deep neural networks
- Applied advanced NLP preprocessing techniques including tokenization, sequence padding, and normalization on large-scale datasets
- Optimized model performance achieving high classification accuracy through systematic hyperparameter tuning and iterative refinement

Object Detection using TensorFlow | Python | TensorFlow | OpenCV | Computer Vision

- Implemented real-time object detection system using TensorFlow Object Detection API and pretrained neural network models
- Fine-tuned advanced models to detect and localize multiple objects in images achieving high precision and recall metrics
- Integrated OpenCV for comprehensive image preprocessing, augmentation, and visualization of detection results

Landmark Detection using TensorFlow | Python | TensorFlow | CNN

- Developed CNN-based landmark detection model for precise spatial point identification in images
- Applied regression techniques to predict accurate landmark coordinates with optimized mean squared error
- Systematically experimented with various neural network architectures, layer configurations, and activation functions

AI-Powered Voice Assistant | Python | NLP | AI Integration

- Developed intelligent voice assistant application capable of processing natural language commands and generating contextual responses
- Integrated advanced generative AI models for sophisticated natural language understanding and generation
- Implemented text-to-speech synthesis enabling seamless voice output and human-like interaction

Smart Billing Software | Python | Business Automation

- Developed comprehensive billing software system for automated invoice generation and transaction management
 - Engineered billing calculation engine automating complex financial computations and reducing manual errors
 - Implemented robust data validation, error handling, and comprehensive financial reporting features
-

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, C, SQL
AI/ML Technologies: Deep Learning, Computer Vision, Natural Language Processing (NLP), Neural Networks, CNN, RNN, Object Detection, Text Classification, Landmark Detection, Model Training & Evaluation
ML Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, NumPy, Pandas, Matplotlib, Seaborn
Web Development: React, Node.js, Express.js, Flask, Tailwind CSS, Firebase, MongoDB, MySQL
Cloud & DevOps: AWS (EC2, S3, Lambda), Google Cloud Platform, Firebase, Vercel, Netlify
Tools & IDEs: Git, GitHub, VS Code, Jupyter Notebook, MATLAB, Figma, Postman, Linux

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Artificial Intelligence & Machine Learning

- Fundamentals of Machine Learning and Artificial Intelligence (AWS)
- Developing Generative AI Solutions (AWS)
- Introduction to Agentic AI on AWS
- Foundations of Prompt Engineering (AWS)
- Developing Machine Learning Solutions (AWS)
- Introduction to Generative AI - Art of the Possible (AWS)
- Introduction to Machine Learning: Art of the Possible (AWS)
- Industrial Program on Artificial Intelligence - Project Completion (1Stop.ai/Personify)
- Machine Learning with MATLAB (MathWorks)
- Machine Learning Onramp (MathWorks)

Data Science & Analytics

- Data Analysis in MATLAB - Learning Path (MathWorks)
- Common Data Analysis Techniques (MATLAB)
- GenAI Powered Data Analytics Job Simulation (Forage/Tata Consultancy Services)
- Data Science Job Simulation (Forage/British Airways)
- Python for Data Science (NPTEL)
- Python for Data Science (Reliance Foundation Skilling Academy)

Cloud & Infrastructure

- AWS Technical Essentials (AWS)
- Introduction to Database Migration (AWS)

Cybersecurity & Networking

- Cybersecurity Essentials (Cisco Networking Academy)
- Exploring Networking with Cisco Packet Tracer
- Getting Started with Cisco Packet Tracer

Core Engineering & Development

- App Building Onramp (MathWorks)
- C for Beginners (Great Learning Academy)
- Future of Gaming in AI Seminar (Sathyabama Institute of Science and Technology)

ENTREPRENEURSHIP

Founder & CEO, ANVE TECH | Website: <https://anvetech.site>

• Founded ANVE TECH, an innovative Chennai-based startup specializing in AI-powered solutions and end-to-end full-stack web development • Core Service Offerings: Custom Website Development, AI Integration, Smart Billing Systems, Custom Business Software, Professional Landing Pages • Successfully built and deployed multiple full-stack applications leveraging React, Node.js, and cutting-edge AI technologies • Established strong professional presence and growing client portfolio in Chennai technology market
